

Product Safety Information

Stacking box, made of PP, ESD conductive, W 314 mm

Manufacturer/Responsible Person: Schäfer Shop GmbH, Industriestraße 65, 57518 Betzdorf, Deutschland

E-Mail: info@schaefer-shop.de

Please note the technical data of the products!

Article Numbers: 135386, 135385, 135384, 135383, 135382

Safety Instructions:

- Product is not suitable for use above -20°C to +100°C; deformation and material changes may result.
- Do not use ESD-conductive stacking boxes above the maximum temperature limit in order to avoid material damage.
- The construction and stability of the stacking box do not guarantee outdoor weather resistance.
- Aggressive chemicals may only be used with caution in order to avoid damage.
- Do not exceed the maximum load capacity to avoid breakages and injuries.
- Protect from heat and direct sunlight to avoid deformation and discolouration.
- Ensure safe transport and storage practices, both in manual and automated handling.
- Do not use harsh cleaning agents to avoid damaging the surface of the material.
- Avoid chemical substances such as acids, oils and alkalis reacting with each other during cleaning.
- If the product is damaged, stop using it immediately and inform the manufacturer.
- For electrical applications, ensure ESD conductivity for every use.
- Ensure correct handling when lifting and transporting to avoid injury and damage.
- Keep out of the reach of children. Not suitable for children under 3 years of age due to choking hazard.
