Safety Instructions:

- Choking hazard due to small parts if the monitor arm is used incorrectly. Keep the product out of the reach of infants and children.
- The maximum load of 19.1 kg must not be exceeded in order to avoid the risk of tipping over. Do not exceed the maximum weight of 19.1 kg.
- Ensure that the monitor arm is correctly installed to minimise the risk of falling injuries. Before use, ensure that the monitor arm is securely attached to the table. Carry out safe installation in accordance with the manufacturer's instructions.
- When using curved monitors, ensure that compatibility is guaranteed to ensure safe handling.
- Use the cable management function to avoid tripping hazards.
- Please note that the monitor arm is suitable for monitors up to a maximum of 49 inches.
- Regularly check for damage to the monitor arm or mountings.
