Safety Instructions:

- Not suitable for children under 3 years of age as small parts may be present.
- High load capacity of up to 110 kg, but make sure that the maximum load is not exceeded.
- Make sure that the chair is used on a stable surface to prevent it from tipping over.
- Proper stacking of up to 15 chairs should be observed to avoid injury or damage to the chairs.
- Take care when transporting stacked chairs to avoid injury.
- Ergonomic design ensures comfort, but longer periods of sitting should be interrupted regularly.
- Risk of suffocation due to improper handling when stacking.
- Risk of injury due to unstable stacking of more than 15 units.
- Risk of crushing injuries if the chair is handled incorrectly.
- Observe safety precautions when using the chair.
- Do not stack on other chairs to avoid loss of stability.
- Check the seat and backrest regularly for wear and tear.
- Make sure that the chairs are not placed near heat sources to prevent material deformation.
