Safety Instructions:

- The product is only suitable for indoor use.
- Connection to a technical exhaust air system is required for adequate explosion protection; the enclosure may only be operated with such a system.
- The applicable safety regulations must be observed when storing and using the cylinders; beware of the risk of explosion due to improper storage.
- Keep the pressurised gas cylinder cabinet away from heat sources and direct sunlight.
- The product is suitable for the storage of hazardous substances; appropriate training is recommended.
- Please ensure that the bottles are always securely fastened and secured to prevent them from tipping or falling over. They should be stored in the holder provided.
- Opening the hinged door can cause danger due to a sudden drop in pressure. Take care when opening.
- Small parts can pose a risk of injury. Children in particular should be kept away from the product.
- Regularly check the gas cylinders for leaks.
- Provide safety data sheets for the stored gases.
- Only allow authorised personnel to set up and operate the appliance.
