Article Numbers: 463392, 463386, 463380

Safety Instructions:

- Only store the product in well-ventilated areas to prevent the accumulation of gases.
- Place the cabinet in a well-ventilated location and connect it to an exhaust air system with a 10-fold air exchange rate to avoid the risk of explosion.
- Prevent access for unauthorised persons.
- Protect the product from direct sunlight and keep away from heat sources and naked flames.
- Take care when handling pressurised gas cylinders; ensure they are properly secured against tipping or falling over.
- Use personal protective equipment when working with gas cylinders.
- The cabinet should be checked regularly for damage.
- Follow the specific instructions for ventilating the cabinet.
- Secure all necessary permits and ensure compliance with local regulations for the storage of pressurised gas cylinders.
- Suitable for indoor use, but only use with a technical exhaust air system.
- Ensure that regular maintenance and inspections are carried out.
- Provide safety information in understandable language.
