Manufacturer/Responsible Person: asecos GmbH, Weiherfeldsiedlung 16-18, 63584 Gründau, Deutschland

E-Mail: info@asecos.com

Please note the technical data of the products!

Article Numbers: 463566, 463565

Safety Instructions:

- Only use the canister for its intended purpose in order to minimise risks.
- Always wear suitable personal protective equipment (gloves, safety goggles) when handling the canister.
- When using the canister with hazardous substances, follow the instructions in the respective safety data sheets.
- Use only for the transport of liquid substances of packing groups I, II and III.
- Do not overfill the canister and secure it during transport to prevent it from tipping over or leaking.
- Improper handling can cause the vent valve to fail, which can lead to overpressurisation of the canister. Pressurised containers can rupture or explode if they are handled improperly.
- Protect the canister from moisture and intense heat and keep it away from heat sources and naked flames.
- Always store the canister upright to prevent accidental leakage.
- Showering or washing in case of skin contact with hazardous liquids; seek immediate medical attention.
- Avoid working in enclosed spaces without adequate ventilation, especially when transporting hazardous liquids.
