Safety Instructions:

- Always observe the labelling and warning symbols before using the safety container.
- Check the ventilation valve regularly for proper functioning and ensure that it is working properly to prevent overpressurisation.
- Do not use for the storage of flammable or explosive substances unless expressly authorised.
- Comply with the regulations for the safe handling of hazardous substances in accordance with the safety data sheets provided.
- If you are unsure or have any questions regarding the use of the container, consult specialised personnel.
- The product should only be used in accordance with the specific safety regulations for handling hazardous substances.
- Only use the safety container for the intended materials; do not mix with aggressive chemicals that are not authorised for this purpose.
- In the event of injury or damage due to improper use, contact the relevant authorities immediately.
- Hazardous substances should be disposed of in accordance with national regulations.
- Instructions and safety information must be provided in an understandable language.
- Ensure that the screw cap works properly before putting the container into operation.
- Check regularly for signs of wear or damage to the container.
