Safety Instructions:

- The disposal container is intended exclusively for the safe disposal of waste containing solvents. Special safety is required for the use of waste containing solvents.
- There is a risk of fire from flammable materials if handled incorrectly. Health risks can occur if handled incorrectly.
- Place the container out of the reach of children to avoid accidents.
- Please check regularly for damage that could impair the functionality of the self-closing lid. If the coating is damaged, repair immediately to prevent rust formation.
- The container should be protected from direct sunlight and extreme temperatures in order to avoid material changes.
- Beware of choking hazard due to improper disposal of small parts.
- Only suitable for commercial use, set up securely to prevent tipping over. Ensure that the container is placed on a stable, level surface to prevent it from overbalancing.
- Avoid filling waste containing solvents via the hinged lid without opening it for testing.
- The disposal container is only to be used for the intended use; not for other waste that is not classified as containing solvents.
