Safety Instructions:

- Check the load capacity of the shelves and observe the maximum loads (50 kg, 60 kg, 150 kg per shelf and 250 kg, 300 kg, 500 kg, 750 kg in total); distribute heavy objects evenly to avoid overloading and tipping.
- Ensure that the cabinet is standing on a stable and level surface before it is loaded.
- Only use the cabinet for its intended purpose and do not load it beyond the recommended load capacity.
- Avoid contact with water, moisture and extreme temperatures to prevent material damage such as rust formation.
- Ventilation openings must not be blocked to prevent moisture accumulation and insufficient air circulation.
- Follow the assembly instructions carefully to ensure safety and stability.
- Ensure that doors and hinges are not forced open or closed to prevent damage and injury.
- Follow the manufacturer's instructions when installing and using the cabinet.
- Check the cabinet regularly for stability and safety, especially during heavy use, and carry out the necessary maintenance.
- Sharp edges and corners can cause injuries; handle the product with care.
- The cabinet is intended for use by adults and should be placed out of the reach of children.
- The cabinet is not to be used as a climbing aid and is not suitable for the storage of hazardous substances.
- Ensure that the maximum load on the shelves and the general load level is not exceeded.
- Always keep the cabinet closed when not in use to prevent it from tipping over or unauthorised access.
- Regularly check the safety and stability as well as the ventilation holes for integrity and blockages.
