Safety Instructions:

- The PE drum may only be used for the transport and storage of non-hazardous liquids and is not suitable for use by children. Keep the product out of the reach of children.
- Due to the presence of hazardous substances, the regulations for the materials used and assembly must be strictly observed.
- Ensure that all connections are properly secured to prevent leaks and possible leakage of liquids. Ensure that the PE drum is not knocked over during transport and storage.
- Avoid contact with high temperatures or direct sunlight to prevent material changes and material exhaustion. The product should be protected from extreme heat or cold to maintain material integrity.
- There is a risk of injury or damage from leaking liquids if handled incorrectly. Suitable personal protective equipment (PPE) such as gloves and safety goggles should be worn.
- Avoid contact with harmful hazardous materials and dangerous substances to prevent health risks.
- Ensure that the drum is only used for the liquids intended for it in order to avoid risks to health and the environment. Observe suitable disposal methods for residual materials and dispose of them in an environmentally friendly manner.
- The product should only be handled by trained personnel in order to minimise potential hazards.
- Ensure that all safety instructions and warnings are observed and understood, especially with regard to the handling of hazardous substances.
- Carry out regular checks for cracks or damage to the drum. When storing, ensure that the drum is stable to prevent it from tipping over.
