Safety Instructions:

- Risk of suffocation due to improper handling or improper storage of small parts.
- Only use the product in accordance with the instructions for storing hazardous substances.
- Ensure that the product does not come into contact with food if it is used for other purposes.
- Avoid overloading the logistics box beyond the maximum permissible load capacity of 3600 kg.
- Secure the product during transport to prevent accidents.
- The use of protective equipment is recommended if the logistics box comes into contact with hazardous substances.
- Suitable for use in contact with food in accordance with Regulation (EU) No 10/2011.
- Improper handling can result in injuries due to the weight of the container.
- The runners allow you to drive underneath safely, but make sure that there are no obstacles in the way.
- The container should not be overloaded in order to avoid structural damage.
- Responsible storage and cleaning are necessary to ensure food safety.
- Only use goods suitable for the transport of foodstuffs.
- Do not stack the box above the maximum load capacity of 750 kg.
- Remove all packaging materials before using the logistics box.
- Check the logistics box regularly for signs of damage.
- Do not overheat or expose to direct sunlight to avoid deformation.
