Safety Instructions:

- Suitable for the transport and storage of electronic components. Use with care to avoid damage.
- Observe the ESD conductivity of the material and only use it in accordance with the instructions to avoid static electricity.
- Keep the open-fronted storage box away from extreme temperatures and aggressive chemicals to prevent damage.
- The product is temperature-resistant from -20°C to +100°C.
- Stack securely to ensure stability; do not overload the crate beyond the maximum load capacity of 10 kg.
