Article Numbers: 33341, 33340, 33339, 33329, 33328, 33327, 33323, 33322, 33321

Safety Instructions:

- Do not exceed the maximum shelf load of 500 kg.
- Do not exceed the maximum bay load of 2500 kg.
- Ensure that the floors are evenly loaded to guarantee stability.
- Place the shelf on a stable and level surface to prevent it from tipping over.
- For heavy loads, secure the stable frame construction to a solid wall to prevent tipping.
- Use suitable methods when assembling and using the shelf. Observe the safety instructions and assembly instructions.
- Use suitable fastening elements to secure the shelf load.
- Consider protective measures to prevent the shelf from tipping over.
- Avoid overloading and uneven load distribution to prevent the shelf from tipping over.
- Use holding and safety devices during installation.
- When storing small parts, use an additional 8 mm chipboard per shelf to minimise the risk of spillage or small parts.
- Store small parts safely to avoid the risk of choking or crushing. Keep the product away from children.
