

Product Safety Information

Shelving system, add-on shelving, stainless steel, perforated base, W 1175 mm

Manufacturer/Responsible Person: Köhler GmbH (Elektrotechnik), Mühlweg 13, 01619 Zeithain, Deutschland

E-Mail: zentrale@koehler-gmbh.de

Please note the technical data of the products!

Article Numbers: 32860, 32859, 32858

Safety Instructions:

- Observe the maximum load capacity of 100 kg per shelf to avoid overloading.
- Assemble the shelving stably and securely, especially when mounting over corners and when using corner connection clamps.
- Ensure that the hygiene requirements for use in cold storage and deep-freeze rooms are met.
- Correct use of the accessories provided, such as diagonal cross and wall fixings, to ensure stability.
- Check shelves regularly for rust, corrosion and damage, especially in damp environments.
- For safe use, follow the manufacturer's instructions for installation and use and ensure that they are available.
- Set up the shelf smoothly and stably, with a fixed wall connection to prevent it from falling over.
- Only use goods suitable for storage and do not store excessive or unintended loads.
- Ensure that the shelf is loaded evenly so that the maximum load per shelf is not exceeded.
- Do not install near water sources to avoid corrosion, even with corrosion-protected material.
- Only use in the intended area of application, e.g. storage of food, refrigerated goods.
