Please note the technical data of the products!

Article Numbers: 32819, 32818, 32817

Safety Instructions:

- Ensure that the shelf is correctly attached to the wall and is standing on a stable, level surface to prevent it from tipping over.
- Do not overload the shelf beyond the maximum load capacity of 150 kg per shelf/shelf width to avoid injury and damage.
- Always use the specified accessories (e.g. diagonal brace) for stabilisation, especially when mounting.
- Carry out regular inspections to ensure that all parts are tight and secure and regularly check the stability and condition of the shelf.
- Avoid storing hazardous substances that could compromise the integrity of the shelf and observe hygiene regulations when storing food.
- Take particular care when installing and using in cold rooms due to the special conditions for such applications.
- The shelf is not intended for use in soft floors.
- The manufacturer's safety instructions must be observed when assembling and using the shelving unit.
- To avoid injury, use suitable lifting techniques when lifting heavy loads.
