Article Numbers: 90892, 90893, 90894

Safety Instructions:

- The stacking boxes are not suitable for use by persons under the age of 14.
- Not suitable for children under 3 years of age due to choking hazard from small parts.
- The product is heavy; the maximum load of 30 kg must not be exceeded in order to avoid breakage or injury.
- Improper stacking can jeopardise the stability of the stacking box. Ensure correct stacking.
- Before stacking several boxes, ensure that the weight limit is not exceeded.
- To avoid injury during use, keep hands away from the top edge of the box.
- The stacking boxes must not be used at temperatures below -20°C or above 100°C.
- In the event of prolonged exposure to chemicals, the compatibility of the material (polypropylene) should be checked. Avoid direct contact with unsuitable chemicals.
- Only suitable for internal use and transport.
- The stacking boxes are not suitable for transporting dangerous or unstable materials.
