Safety Instructions:

- The substructure workbench is not to be used as a standing or sitting solution.
- Ensure that all parts are properly assembled to avoid instability.
- The maximum load capacity of the drawers is 75 kg, avoid possible overloading.
- The maximum load capacity of the entire workbench is 600 kg and must not be exceeded.
- The feet must be mounted correctly and placed on a stable, level surface to minimise the risk of tipping over.
- Avoid crushing and cutting injuries: Make sure you close the drawers carefully and do not place your hands in moving parts of the drawers.
- Avoid contact with water or damp conditions to prevent material damage.
- The workbench is not suitable for outdoor use in order to avoid damage caused by the weather.
- Use suitable tools and observe the corresponding safety instructions.
- Always wear suitable protective equipment when using heavy tools or machines.
- Children should be kept away from the workbench to minimise the risk of injury.
- Do not use the workbench as a ladder or for other unintended purposes.
- Keep the work surface free of obstacles to avoid tripping hazards.
- Regularly check the stability of the feet and the entire frame.
- Do not use aggressive cleaning agents to protect the surfaces.
- Sharp edges and corners can cause injuries, so handle with care.
- The workbench may only be used for its intended purpose; improper use may result in injury.
- Check the workbench regularly for stability and wear, do not use if damaged and contact the manufacturer.
- Do not overload drawers when fully extended to avoid damage.
- Avoid excessive loads on the drawers to minimise deformation or breakage.
- Use protective material if the worktop comes into contact with sharp or extremely hot objects.
- If electrically operated tools are used, observe specific safety guidelines.
