Safety Instructions:

- The mat is flame-retardant (B1 according to DIN 4102); do not use near open flames or hot surfaces.
- Not suitable as a toy for children or for children under 3 years of age, as small parts and sharp edges may be present.
- Extreme temperature resistance (-100 °C to +120 °C); avoid temperatures above 120 °C as this can affect the material.
- On smooth floors, use the underside with a safety device such as the VAB® adhesive layer or place it on hard floors to avoid the risk of slipping.
- When using on carpeted floors, ensure that the anchor studs are correctly attached to avoid the risk of slipping.
- Not suitable for use on wet, slippery, uneven or damaged floors.
- Regularly check the integrity of the mat for wear, cracks or mechanical damage.
- Do not apply excessive pressure or load to avoid cracking.
- Take care when using chemical cleaning agents and disinfectants; use mild soap solutions.
- Do not use in areas exposed to direct sunlight or high electrical voltages.
- When handling, please ensure that the edges are not sharp to avoid injury.
