Please note the technical data of the products!

Article Numbers: 724144, 724143, 724138

Safety Instructions:

- The product can cause injuries if used improperly.
- Read the product instructions carefully to ensure correct use and maintenance.
- Switch off the appliance when it is not in use to prevent unwanted operation.
- Avoid contact with water to minimise electrical risks as the product may contain electrical components.
- Before use, ensure that the hydraulic cylinder is not overloaded to prevent damage.
- In the event of damage or leaks in the hydraulic system, take the product out of operation immediately and contact the manufacturer.
- When using hydraulic components, make sure that there are no leaks.
- The clamping force should always be adjusted to the respective application in order to avoid over-tightening or damaging the workpiece. The infinitely variable adjustment of the clamping force can lead to unstable applications if the setting is incorrect.
- Ensure that the magnetic base is used in a stable and clean manner to prevent it from slipping or tipping over. Please note that the strong magnetic base adheres to metallic surfaces.
- The product should only be used on stable and level surfaces to prevent it from tipping over.
- Observe the operating conditions and maximum loads in accordance with the technical specifications.
