Safety Instructions:

- Wear suitable personal protective equipment, such as safety goggles and gloves.
- Observe the maximum speed of 12200 rpm to avoid overheating and breakage.
- Do not use the serrated lock washer if the structure is damaged or deformed.
- Before use, ensure that the serrated lock washer is correctly fitted and tightened.
- Recommend use only by trained personnel who are familiar with the handling of grinding tools.
- Choking hazard due to small parts in case of improper use or incorrect handling.
- Risk of cutting and crushing due to sharp edges and moving parts.
