Safety Instructions:

- Use suitable safety goggles, hearing protection and, if necessary, a respirator to prevent injuries from sparks, noise and inhalable particles.
- Do not exceed the maximum speed of 12200 min⁻¹ to avoid safety risks such as overheating.
- Only use the flap disc on machines intended for this purpose and ensure suitable means for its use.
- Before use, check the serrated lock washer for damage and ensure that it is correctly fitted and securely fastened.
- To avoid corrosion, do not use the serrated lock washer in damp or wet environments.
- When processing aluminium and stainless steel, pay attention to friction and heat development in order to avoid overheating.
- Do not overload the serrated lock washer to avoid overheating.
