Please note the technical data of the products!

Article Numbers: 702228, 702226, 702225

Safety Instructions:

- Use of the cutting disc can cause injuries. Wear safety goggles, hearing protection and gloves to protect your eyes, ears and hands.
- Excessively high speeds can damage the cutting disc; observe the maximum speeds. Maximum speed: 4400 min⁻¹ and 5100 min⁻¹.
- Flying sparks can cause injury; wear safety goggles and do not work near flammable materials to minimise the risk of fire.
- Only use for intended applications such as solid material, profiles and pipes; avoid unsuitable applications.
- Before use, check the cutting disc for damage and ensure that it is correctly fitted and aligned.
- Keep the working environment clean and do not work in the vicinity of other people to minimise the risk of accidents.
- Keep body parts and loose clothing away from moving parts.
- Check durability and operating conditions regularly. Appropriate training in the use of cut-off machines is recommended in case of insufficient experience.
