Safety Instructions:

- Only use the product in accordance with the instructions and intended use to avoid injury.
- Wear suitable protective equipment such as safety goggles and gloves when working to prevent injuries.
- Keep the product out of the reach of children. It is not suitable for children and there is a choking hazard due to small parts.
- Check the product regularly for damage to avoid safety risks. It should only be used when in good condition.
- Only use the product with suitable equipment and impact wrenches; ensure compatibility with electric and pneumatic impact wrenches.
- The product may only be used by qualified personnel or appropriately trained persons in order to minimise the risk of injury or damage.
- Safe handling and careful fixing of the workpiece are necessary to avoid injuries.
- The product should only be used when dry to avoid electrical risks.
- Follow all safety instructions, especially when using compressed air.
- Ensure protection against hazards due to improper handling and follow the safety information.
