Safety Instructions:

- Use product under high pressure, max. pressure range: 60 bar. Avoid overpressurising.
- Protect against overheating and do not use near heat sources to avoid danger.
- To minimise risks, do not carry out leak tests on damaged pipes.
- Carefully bleed the test pump after use to ensure depressurisation and avoid hazards.
- Use only in well ventilated areas to avoid hazardous vapours.
- Ensure your own safety by wearing gloves and safety goggles, protective clothing if necessary.
- Only authorised personnel may use the test pump and keep children away from the product.
- Regularly check the condition of the pump for cracks or damage to prevent leaks.
- Follow your manufacturer's instructions for safe commissioning and use.
