Safety Instructions:

- Risk of suffocation if used incorrectly or if small parts are retained, especially if used by children.
- Risk of injury due to improper handling of the tool and uncontrolled torques.
- Risk of electric shock due to improper use or defective electrical components.
- Always use in accordance with the instructions for use to avoid hazards.
- Wear suitable protective equipment (e.g. gloves, safety goggles) when working at high torques or under pressure to avoid injury.
- Keep tools out of the reach of children to minimise risks.
- Regular calibration and testing of the device is required to ensure safety and accuracy.
- Ensure that all users follow the operating instructions and safety instructions.
- Only use the product with recommended and compatible tools and accessories to minimise safety risks.
- Ensure that torque specifications and settings meet the specific requirements to avoid material failure.
- Check the cleanliness of fittings and connections before use to ensure accuracy.
- Avoid damage by handling and storing the tool correctly.
- Plastics can be damaged if handled improperly and pose a safety risk.
