Safety Instructions:

- Check assembly and condition for cracks or damage before use to avoid safety risks.
- Use the product in the intended area of application, do not overload to avoid material failure.
- Only use in conjunction with suitable electric or pneumatic impact wrenches.
- Ensure that the socket is correctly anchored in the tool to prevent it from slipping.
- Protect the product from moisture and extreme temperatures to prevent corrosion.
- As the product is made of special steel, wear suitable protective equipment such as gloves and safety goggles to prevent injury from abrasion or splinters.
- Compliance with the maximum torque limits to prevent the tool from breaking or failing.
- Ensure that the insert is not overloaded to avoid material failure.
- Check the functionality of the tool and the tools before use to avoid safety risks.
- The storage location must be dry and safe to prevent corrosion and damage.
- Do not use the product for applications for which it is not intended and do not make any improper modifications to ensure safety.
- Avoid risk of suffocation and injury due to improper handling of the product.
- Keep the product out of the reach of children to avoid injury.
- Read the operating instructions before commissioning and ensure that all safety precautions are observed.
