Safety Instructions:

- Use suitable personal protective equipment (e.g. gloves, safety goggles) to avoid injury.
- Only use the product for the specified applications (e.g. perforating steel sheets up to 3 mm).
- Only trained personnel should operate the machine.
- Regularly check tools and safety devices for wear and functionality and do not use the appliance if it is damaged.
- Ensure that the work area is free of obstacles and tripping hazards and that the workpiece is stable.
- Follow the operating instructions and the manufacturer's instructions for safe handling.
- Protective equipment or safety devices must not be removed.
- Ensure that the tension screw is correctly tightened to avoid accidents.
- After use, the product should be safely cleaned and stored to ensure longevity and safety.
- Only use the product in dry conditions and not under the influence of moisture or humidity.
- Keep the work area clean and free of small parts that are not floating around.
- The product is not suitable for children and inexperienced users.
- Avoid contact with sharp edges of the punched parts to prevent cuts.
- Ensure that you keep an appropriate distance from other users during operation.
- Do not wear loose clothing to avoid getting caught in moving parts.
