Safety Instructions:

- Before use, ensure that no loose parts or clothing get into the work area.
- Choking hazard: Keep product away from children.
- Risk of injury: wear suitable protective equipment (e.g. gloves, safety goggles).
- Before connecting to a power source, ensure that all connections are correct to avoid the risk of electric shock.
- Observe the maximum material thickness of 4 mm; only use the product in the intended area of application.
- Only allow qualified personnel to operate the appliance to prevent injuries caused by improper use.
- Check the tool for damage before use.
- Do not use near flammable materials to avoid the risk of fire.
- Keep the work area clean and well lit.
- Do not allow untrained persons to use the product.
- Keep children and unauthorised persons away from the work area.
- Handle the product with care to avoid injury.
- Wear safety goggles to avoid eye injuries.
- Do not reach near the cutting area during operation.
- Wear protective clothing to avoid injuries caused by the risk of cuts.
- Store safely in a dry place to prevent corrosion damage.
- Caution: Risk of injury from sharp edges during use.
- Use by trained persons and under adult supervision.
- Place the appliance on a stable, secure surface to prevent it from slipping.
- Keep the surrounding area free of people and objects when punching round holes.
- Avoid contact with rotating parts.
