

Product Safety Information

Fiberglass rod pro set tape l.80m bend r.168mm cable d.6mm

Manufacturer/Responsible Person: Runpotec GmbH, Irlachstr. 31, 5303 Thalgau, Österreich

E-Mail: office@runpotec.com

Please note the technical data of the products!

Article Numbers: 715373, 715372, 715371, 715370

Safety Instructions:

- Avoid loading the fibreglass rod beyond the specific tensile load of up to 2200 kg to prevent overloading and breakage.
- Make sure that the bending radius is not exceeded to avoid breakage.
- Secure the fibreglass rod during use to prevent uncontrolled leakage.
- The use of protective equipment is recommended to avoid injury in the event of the material breaking or falling.
- Store all accessories safely to minimise the risk of injury from small parts.
- Choking hazard due to small parts in the accessories.
- Risk of injury from sharp edges of the metal components.
- Risk of electric shock due to improper wiring or use of electrical components.
- Danger due to improper handling of electrical components.
- Risk of injury from moving parts during operation.
- Read the operating instructions carefully before use.
- Safety warning: Only suitable for skilled operation and extreme care must be taken during use.
