

Product Safety Information

Voltage/ continuity tester DUSPOL® expert 12-1000 V AC/DC

Manufacturer/Responsible Person: Benning Elektrotechnik und Elektronik GmbH & Co. KG, Münsterstr. 135-137, 46397 Bocholt, Deutschland

E-Mail: info@benning.de

Please note the technical data of the products!

Article Number: 719417

Safety Instructions:

- When using the device, ensure that the switch-on lock is deactivated to prevent unintentional measurements.
- Before using the test device, the functionality should be checked on a known voltage source.
- Never use the device with voltages that exceed the specified limit values (12 V - 1000 V AC/DC).
- Protective measures against electric shocks must be observed, especially when working on electrical installations.
- The appliance is not suitable for children and may only be used by trained personnel.
- Protect the device from moisture, although it is protected to IP65 standard (dustproof/protected against water jets).
- After use, the appliance should be properly cleaned and checked for damage to ensure safety and function.
