Article Number: 719418

Safety Instructions:

- Only to be used by qualified specialists
- Ensure that the device is working properly before use
- Visual inspection for damage or wear and tear before use
- Take particular care when working with voltages above 50 V
- Avoid direct contact with live parts
- Do not use the product in a damp environment unless it is intended for this purpose
- Ensure that protective equipment is worn (e.g. insulating gloves)
- During the continuity test, make sure that all live parts are switched off
