Safety Instructions:

- Caution: Non-contact operation can lead to incorrect settings.
- Ensure that the device is not used above the maximum voltage limit (1000 V AC).
- When testing, only work on live parts if personal safety precautions are observed.
- Check the appliance regularly for damage to ensure safety and functionality.
- Wear recommended protective clothing and equipment, including insulating gloves and goggles.
- Keep away from untrained personnel to avoid misuse and misunderstandings during use.
- If used simultaneously with other electrical devices, check compatibility and possible risks.
