Safety Instructions:

- Avoid contact with wet surfaces and only use the surrounding area when it is dry to prevent electric shocks.
- Only use the appliance in accordance with the manufacturer's instructions.
- Do not touch measuring probes with current while they are connected and always use protective caps to ensure safety in the CAT IV and CAT II categories.
- Keep measuring tips away from children to avoid injury.
- Before use, ensure that the measuring probes are connected correctly to prevent short circuits.
- Only use with devices that are suitable for use with CAT IV 600 V / CAT III 1000 V.
- Always disconnect the measuring tips when the device is unplugged to avoid danger.
