Safety Instructions:

- Risk of suffocation due to inadequate locking mechanism if used incorrectly.
- Risk of injury from moving parts during rotation. Ensure that no body parts are trapped during the 360° rotation.
- Ensure that the turning mechanism is serviced regularly to prevent malfunctions. Before use, ensure that the turning mechanism is working properly and is not blocked.
- Check the locking device regularly to prevent it from slipping during use. Always activate the stepless locking device before working on the vice.
- The appliance should only be used by trained personnel to avoid accidents. Ensure that the user is informed about the operation and risks of the product.
- Ensure that nobody is in the vicinity of the vice while you are operating the bogie.
- Only use the product for its intended purpose and in accordance with the manufacturer's instructions. Follow the instructions for safe use before use.
- Check the entire device regularly for damage. If the product is damaged, stop using it and contact the manufacturer if necessary. If the product is damaged or worn, stop using it immediately.
- Observe protective measures to avoid injuries due to improper use.
