Safety Instructions:

- Ensure that the appliance is correctly mounted and secured to prevent it from tipping or falling over.
- Take care when using the appliance under load. Ensure that the product is used on a stable, level surface.
- Use of the appliance by children is not recommended.
- Ensure that the vice is securely mounted and firmly locked before carrying out any work.
- Make sure that no body parts are near the moving part of the appliance while it is in motion to avoid injury. Avoid contact with the moving parts during operation.
- It should only be used by trained or qualified personnel and should be operated in the manner intended by the manufacturer.
- Regularly check and maintain the gas strut to ensure that it functions properly. If the product is damaged, it must no longer be used.
- The standpipe should be cleaned with suitable, non-aggressive cleaning agents so as not to damage the surface treatment.
- Read the operating instructions carefully before using the product.
- The product must not be overloaded; follow the weight specifications given.
- There is a risk of injury from crushing if handled incorrectly. Operate the safety lever before use to prevent uncontrolled movements.
- Only use suitable tools to adjust the height.
- Wear safety goggles in case chips or other particles are produced when working with the vice.
