Please note the technical data of the products!

Article Numbers: 726134, 726132

Safety Instructions:

- Only use the plug in dry environments, as it is splash-proof (IP44), but not suitable for use under water.
- Do not use the plug if the connection terminals or the housing are damaged.
- Ensure that the electrical requirements (32 A, 400 V) are met before use.
- To avoid electric shocks, only connect or disconnect the plug when the power supply is switched off.
- Keep the plug away from small children as it is an electrical product.
- Risk of electric shock if used incorrectly.
- When using the plug, ensure that it is not used in wet environments unless labelled accordingly.
- Ensure that the plug is correctly inserted into the socket.
- Keep packaging and products away from children to avoid the risk of choking on small parts.
- Ensure that the connection screws are properly secured to avoid electrical contact.
