Safety Instructions:

- Be aware of the risk of suffocation in the event of improper handling outdoors.
- Risk of electric shock if used incorrectly or if the housing is damaged.
- Risk of overheating due to insufficient fuse protection or overload.
- Use only for its intended purpose and follow instructions for proper use.
- Check technical safety requirements before use.
- Protect the appliance from moisture as it is splash-proof (IP44) and do not use in heavy rain or flooding.
- Only use outdoors if the device type permits this and exercise caution in extreme weather conditions.
- Do not exceed the maximum fuse rating of 32A.
- Do not make any modifications to the electrical equipment.
- Check electrical connections for correct wiring before commissioning.
- In the event of damage to the cable or plug, disconnect from the mains immediately and discontinue use.
- Regular inspection for damage recommended.
- Ensure that the product fulfils the regional regulations.
- Install the device properly before operation.
- Do not allow unauthorised persons to use the device.
