Safety Instructions:

- Read the operating instructions carefully before using the product.
- Wear suitable protective equipment, including safety goggles, hearing protection and gloves.
- Only use the product by qualified personnel or under their supervision.
- Ensure that the working environment is well lit and free of obstacles.
- Avoid contact with water or damp environments during use to prevent the risk of electric shock.
- The product is not suitable for children and should be kept out of their reach.
- Only use the product for the intended materials and applications.
- Check the drill bit or tool regularly for damage before using it.
- Sharp edges of the drill bit can cause injuries, avoid direct contact and secure the drill bit properly.
- Wear suitable personal protective equipment to prevent injury from flying particles.
- Ensure that there are no foreign objects in the drilling area to minimise the risk of injury or damage.
- Keep loose clothing and hair away from moving parts.
- Carry out eddy current tests for unexpected electrical cables or pipes.
- Read the manufacturer's safety instructions and adhere to all recommended operating values.
- Do not leave the product unattended while it is in operation.
- Check the drill bit for correct assembly and secure the holder correctly, especially with SDS max rotary hammers.
- Only handle the drill with sufficient cooling and lubrication to avoid overheating.
- After use, store in a safe place to prevent unauthorised access and injuries.
