Safety Instructions:

- Always ensure that the vice is correctly mounted on the machine to prevent it from slipping during use.
- Use personal protective equipment, especially safety goggles and gloves, during operation to prevent injuries.
- Keep fingers and hands away from the jaws when clamping the vice to avoid crushing.
- Ensure that the workpiece is stable and securely fixed to prevent it from slipping during the machining process.
- Do not clamp beyond the maximum specified clamping force to avoid damaging the vice or workpiece.
- Keep the work area free of obstacles to avoid tripping hazards.
- Observe specific safety protocols and instructions when using on NC milling machines.
- Regularly check the safety mechanisms and the integrity of the vice components for wear and tear.
- The product may only be used by trained persons in accordance with the operating instructions in order to avoid accidents.
- Ensure precise fixation on machine tables to prevent injuries.
- Take care when using on swivel plates to avoid slipping.
- Regular maintenance and inspection of the clamping system to ensure safety.
- Do not load beyond the permissible load to avoid material failure.
