**Article Numbers:** 146781, 146780

### Safety Instructions:

- Only use the chair at the intended working height and ensure that the safety mechanisms are set correctly.
- Make sure that the armrests are correctly adjusted to avoid tension and injuries in the neck and shoulder area.
- Regularly check the stability of the castors and the base as well as the mechanism to avoid the risk of falling and unsafe use.
- The maximum load of the chair is 110 kg; do not exceed this weight.
- The chair is not suitable for use by children under the age of 14.
- Avoid naked flames or hot objects in the vicinity of the chair, as the material is flame retardant in accordance with EN 1021 Part 1+2.
- The safety double castors are suitable for all floor types; make sure that the chair cannot tip over on uneven surfaces.
- For users with special needs or health restrictions, use should be discussed with a specialist.
- The recommended sitting time of up to 8 hours should not be exceeded.
- Keep the chair clean.
