Safety Instructions:

- Beware of sharp edges when handling the cabinet.
- Place the cabinet on a stable, level surface and, if the floor is uneven, take measures to stabilise it to prevent it from toppling over.
- Do not exceed the maximum load of 50 kg per shelf to avoid overloading, breakage and tipping over. Heavy objects should always be placed on the lower shelves.
- Use lockable doors and ensure that keys are stored securely to prevent unauthorised access and keep children away to avoid the risk of injury from climbing.
- Ensure correct installation in accordance with the operating instructions and make sure that all parts are properly secured to avoid injury. Seek assistance during installation.
- Read the installation instructions carefully before starting the installation. Safety note: Only use the cabinet for its intended purpose.
- Avoid closing the doors with force or placing heavy objects on them to prevent damage and injury.
- Regular maintenance and checks for rust or damage should be carried out. Repair any damage immediately.
- Attention: Cabinet is heavy, please ask for assistance during transport and assembly.
- Take care when using the doors to avoid crushing.
