Safety Instructions:

- Do not load drawers beyond the maximum load capacity (75 kg per drawer, up to 200 kg in total) to avoid overloading and mechanical damage.
- Place on a level, dry surface to prevent tipping and falling over.
- Use the central lock to prevent unauthorised access. Ensure that the key is not accessible to unauthorised persons.
- Carry out regular maintenance and functional tests of drawer mechanisms and locks, paying particular attention to sharp edges and mechanical damage.
- Keep the drawer cabinet away from sources of water and avoid contact with liquids to prevent water damage.
- Read the safety instructions and assembly instructions before use to ensure correct handling and avoid injury.
- Avoid pulling out several drawers completely at the same time to minimise the risk of tipping.
- Open and close drawers evenly and not jerkily, and always close them after use to ensure stability.
- Keep the area around the cabinet free of obstacles to avoid tripping hazards.
- Do not overheat the product or expose it to direct sunlight to prevent material damage.
- Drawers are fitted with a locking mechanism; ensure that this is used properly to prevent accidental removal.
- The cabinet should only be used by adults in order to avoid injuries caused by improper use.
- Use suitable aids when moving the cabinet to avoid injury.
