Safety Instructions:

- Do not load drawers above the maximum load capacity of 75/200 kg to avoid tipping or damage.
- Use the central lock to prevent unauthorised access.
- Use the drawer lock to prevent the drawers from tipping over.
- Ensure that the drawer cabinet is stable on a level surface to prevent it from tipping over.
- The drawer cabinet is only suitable for indoor use; protect from moisture to prevent corrosion damage.
- Not suitable for children; keep out of reach to avoid misuse and danger.
- Always use suitable lifting techniques and pay attention to safety when lifting heavy loads in order to avoid injuries.
- If the cabinet is damaged, do not use it and contact the manufacturer.
- Take safety precautions due to heavy components; risk of injury possible.
- Keep the keys for the central lock out of the reach of children.
- Avoid direct contact with aggressive chemicals so as not to damage the materials.
- The drawer cabinet should not be used as a ladder.
- Always check that the drawers are fully inserted to ensure stability.
- Pull out drawers completely to ensure safety when accessing.
- Suitable handling and storage required due to the weight of the cabinet (118.4 kg) to avoid injury.
