Safety Instructions:

- High load capacity of the drawers of up to 200 kg can lead to injuries due to tipping or crushing if used incorrectly.
- Do not exceed the maximum load capacity of the drawers (75 kg and 200 kg depending on the version).
- Drawers are protected against tipping and being pulled out completely. Make sure that drawers are always pushed fully back into the racks.
- Place the product on a stable surface to prevent it from wobbling or tipping over.
- Read the operating instructions and safety instructions carefully before use.
- Only pull out drawers completely when they are adequately secured to prevent them from falling out in an uncontrolled manner.
- Do not use the product in areas with mechanical or chemical hazards that may impair corrosion resistance.
- Do not install near water sources to avoid damage from liquids.
- Ensure that children do not have access to the cabinet to avoid the risk of injury.
- Wear suitable protective clothing during installation and handling to avoid injury.
- Use the central locking system to prevent unauthorised access.
- Note the weight specification: The cabinet weighs 91.87 kg - ensure stable installation.
- The drawer cabinet should only be used for its intended purpose.
- Ensure safe and proper use of the central locking system.
- Do not use harsh or abrasive cleaning agents when cleaning to avoid damaging the surface coating.
- Take care when handling heavy tools and objects in the drawers to avoid injury.
- In the event of damage or malfunctions, contact the manufacturer and follow the maintenance instructions.
- Carry out regular checks for mechanical damage or wear.
