Safety Instructions:

- Note the panic lock: The belt releases under pressure to prevent injuries. The panic lock should be tested regularly for proper function.
- Use the centrifugal brake on the belt to prevent it from snapping back too quickly and to reduce injuries. Avoid pulling the belt back too quickly.
- Recommended extension length: The belt should not be extended beyond 2000 mm to ensure safe handling and avoid falls or injuries.
- Post height: The belt post is 955 mm high - secure installation and correct alignment are crucial for stability.
- Ensure that the belt post is stable and the base plate is placed on a level surface to prevent it from tipping over.
- Pay attention to small parts: Keep the harness post out of the reach of small children to avoid entanglement or choking hazards. Be aware that small parts can pose a choking hazard.
- The product should only be used in accordance with the instructions provided and should be checked regularly for damage in order to minimise safety risks.
- Use under adult supervision recommended as the product may be potentially attractive to children.
- Prevent children from playing with the harness or the post to avoid injury.
- Do not use the belt post in areas where it could pose a tripping hazard.
- Regularly check the condition of the belt post and the belts for damage.
- Check the edges of the metal parts, as sharp edges can pose a risk of injury; ensure optimum positioning and use.
