Safety Instructions:

- Place the cabinet on a stable, level surface to prevent it from tipping over.
- Max. Note load capacity: 75 kg or 200 kg depending on drawer version.
- Do not overload drawers to avoid tipping or damage.
- Ensure safety against tipping and complete removal of the drawers.
- Use a central locking system or central lock to prevent unauthorised access.
- Check for stability before use to prevent tipping.
- Keep the product dry to prevent corrosion and do not place it near heat sources.
- Do not use aggressive or harsh cleaning agents when cleaning to avoid surface damage.
- Check the cabinet regularly for damage to ensure safety features.
- Keep the area around the cabinet free of obstacles to prevent falls.
- Place the cabinet out of the reach of children.
- Read the assembly instructions carefully before first use.
- Use only for the intended purpose to minimise hazards.
- Do not open drawers at the same time to avoid unstable balance.
- Check locks regularly for functionality.
