### Safety Instructions:

- Observe the maximum load of 200 kg/m<sup>2</sup>. Observe the maximum weight of 200 kg/m<sup>2</sup> in accordance with the EN 1004 standard.
- Only use on a stable and load-bearing surface. Ensure that the surface is stable and load-bearing before use.
- Observe safety precautions for indoor and outdoor use.
- Railings and fall protection must be correctly installed before each use to avoid the risk of falling.
- Adjust height-adjustable elements according to the instructions.
- Use non-slip rungs when climbing to avoid falls.
- Do not extend beyond the maximum working height.
- If you are unsure about the installation, consult a specialist.
- The scaffolding must not be moved while people are standing on it.
- Use personal protection and safety harnesses when working at great heights. Special precautions are required when working at heights above 3 metres.
- The working scaffold may only be erected and used by adults.
- Do not exceed a maximum covering distance of 2 metres.
- Sharp edges and damage should be avoided when transporting and storing the scaffolding.
- Users should ensure that no other persons are working in the immediate danger zone.
