Safety Instructions:

- Take care when lifting heavy objects to avoid injury.
- The cabinet must be stable and placed on a level surface to prevent it from tipping over.
- Maximum load per shelf: 50 kg. Do not exceed this load capacity to avoid overloading and damage.
- Do not overload the shelves with heavy objects weighing more than 50 kg to prevent deformation or breakage.
- Use the rotary bolt lock and keep the key out of the reach of children to prevent unauthorised access.
- The cabinet should be checked regularly for stability, safety functions and the condition of the doors and locks.
- Ensure that the product is only used in dry indoor areas to prevent corrosion damage.
- Avoid proximity to heat sources and direct sunlight to prevent damage to the material.
- The doors of the cabinet must be properly closed to prevent injuries and ensure safety.
- Keep small parts away from children to avoid the risk of choking.
- The cabinet is not designed for the storage of chemical, highly flammable materials or foodstuffs.
- Read and follow the safety information carefully to minimise risks.
- Watch out for sharp edges and corners of the cabinet to avoid injury.
- The product is not suitable for use by children and should be secured accordingly.
