Safety Instructions:

- The cabinet must be mounted stably to prevent it from tipping over. During assembly, make sure that all parts are securely fastened to ensure stability.
- Take care to store heavy objects safely and do not exceed the maximum load of 50 kg on the shelves to avoid damage.
- The product is not designed for use by children and should be placed out of their reach to prevent injury. It is specifically not intended for children under the age of 12.
- Avoid using the cabinet if it is damaged and ensure that all doors are fully closed to avoid injury.
- Ensure that no sharp objects are used near the door mechanisms and that the powder coating is not damaged to avoid injury.
- The product should only be used in the intended indoor area and should be protected from direct sunlight and moisture.
- The security cylinder lock should function properly to prevent unauthorised access.
- The hinged doors should be fitted with noise-absorbing rubber buffers to prevent injuries.
- Read the instructions carefully during assembly and tighten all screws firmly to ensure safety and stability.
- Do not use the cupboard as a staircase or step.
- Keep the product and its surroundings clean to avoid the risk of tripping or contamination.
