Article Numbers: 403079, 403077, 403076, 403075, 403072, 403071

Safety Instructions:

- Maximum load capacity of the shelves: 50 kg; do not exceed this limit.
- Mount the top cabinet stably and securely and fix it to the wall to prevent it from tipping over.
- Keep the cabinet away from moisture, wet environments, direct heat and extreme temperatures to prevent material damage.
- Keep children away from the cabinet and its use to avoid injury from tipping or crushing.
- Distribute heavy objects evenly; do not overload the cabinet so as not to jeopardise stability.
- Do not use the product as a climbing aid or ladder.
- Close the doors completely and open them at an angle of 108° to avoid injury.
- For use, carefully observe the safety and application instructions as well as the installation instructions.
- Regularly check the stability and condition of the cabinet and the connections.
- Follow the instructions carefully during installation to ensure safety.
- Security cylinder lock with 2 keys when not in use for secure locking.
- Use sound-absorbing rubber buffers on the doors to reduce noise.
- Place the cabinet on stable surfaces to prevent it from tipping over.
- Sturdy steel construction protects against mechanical damage.
